INTERNSHIPS AND PROJECTS

INTERNSHIPS:

- **Web Development Intern (RAIT-ACM):**   (Apr-June 2021)
  A web development internship organized by **RAIT-ACM.** We developed a project **RAIT-Calendar** a **Django-based website** for our college in which all the scheduled events are displayed. In this calendar, we can search the events using several filters referring to the branches and committees in our college.

PROJECTS:

- **Blood Bank Management System:** The Blood Bank Management System is a **Django-based website** that helps store and manage blood bank details, including blood inventory, donor information, and blood requests, to ensure efficient coordination and access to blood transfusion needs.
- **E-commerce website:** The E-commerce website is a **Django-based** platform developed for learning purposes, providing features such as user registration, product catalog, shopping cart, order management, payment integration, and search functionality.
- **Booker Application:** As a **UI Design** and **User Experience Design**, I am currently working on a case study for the UI design of a Booker Application, specifically for a **book store.** The focus is on creating an intuitive and visually appealing user interface that enhances the user experience of browsing and purchasing books within the application.
- **UI Design Project Portfolio (Dribbble):** Showcased a collection of my UI design projects on **Dribble**, a prominent design platform, highlighting my skills in creating visually stunning and user-friendly interfaces for various applications.
